

Hi! If you are in the first or the fourth grade, welcome to our school! If you are in the 2nd, 3rd, 5th or 6th grade, welcome back! It's great to see all of you. And this is the start of the 2018 school year! Are you excited? You should be. So much is going to happen this year. You'll laugh. You'll cry. You'll get taller (probably). You'll make new relationships¹. You'll lose old relationships. You'll learn. You'll grow as people. You'll pass² tests. You'll fail³ tests. But, overall⁴, you will have a lot of experiences⁵. I'm excited.

Something Interesting (Nestle⁶)

1. Henri Nestle started out selling powdered milk⁷ for babies that had been invented⁸ in 1867.
2. In 1857, Daniel Peter worked out how to make milk chocolate, but he didn't know how to remove all of the water from the milk. This made the chocolate go moldy⁹. He teamed up with Henri Nestle because Nestle knew how to make powdered milk.
3. The Nestle company is the world's largest food company. It has 447 factories, operates¹⁰ in 194 countries, and employs¹¹ around 339,000 people.
4. The Nestle logo shows three birds in a nest¹². This is because Nestle means "little nest" in German.
5. Nestle has more than 8,000 brands.

Nestle Launches Ruby KitKat

The Nestle company has launched¹³ a ruby KitKat in Europe. The pinkish bar has been on sale in Japan for some time and now Nestle think the rest of the world is ready for it. Have you tried it? The bar was created for Nestle by Barry Callebaut which is a Swiss chocolate company and Japanese chef Takuya Hiramatsu. He has been responsible for¹⁴ nearly all of¹⁵ the unusual flavors of KitKat that you can find in Japan. How many of them have you tried? Wasabi? Green tea? Raspberry? There was even a gold leaf¹⁶ one.

Nestle is trying to move its confectionery¹⁷ upmarket¹⁸ and this ruby bar will be marketed as a luxury¹⁹ chocolate. Nestle want a chocolate for every type of person. This ruby bar is not colored. It is made using ruby cacao beans which are naturally ruby colored. The company say that it doesn't use berries, berry flavor or coloring. The bar is supposed to be healthy and has a reduced²⁰ sugar content. A lot of confectionery companies are trying to produce low sugar chocolate these days. If you find a ruby KitKat,

Strange World Records

Do you like doing dangerous things? Do you like lifting heavy objects? Then you could become a juggler like Milan Roskopf. He has the Guinness World Record for juggling chainsaws. He managed to juggle them 63 times! And he still has both of his hands! He also holds the world record for juggling bowling balls. He managed to juggle three 12 pound (5.4kg) bowling balls for 30 seconds! Have you ever been bowling? Those balls are heavy. He is from Slovakia and started juggling when he was young.

★ Places you should visit ★

If you get the time and the money, you should visit Salar de Uyuni, Bolivia. What is it? It is the world's largest salt flat. It is 10,582km². To give you some perspective¹, Sapporo is 1,100km². What is a salt flat²? It is a sea that has evaporated³ away to leave a thick crust of salt on top of a very salty brine⁴. And why is this salt flat special? Well, not just its size, but the fact that the land is almost perfectly flat makes it incredibly beautiful. It is pure white and, if it has rained a little and the weather is right, it becomes the surface of an enormous mirror. You can do 1 to 4 day tours of the area. You can take an overnight bus from La Paz to Uyuni and start the tour when you arrive. If you do go, don't forget to buy me a present. Something nice and expensive!

★ A Strange World Food ★

Hakarl

Hakarl is a food from Iceland. It is Greenland Shark. The shark's meat is poisonous⁵ if eaten fresh. It is cleaned and buried⁶ for two to three months. Then, it is dug up and dried for about half a year. It is then eaten. It has a very strong taste of ammonia⁷. A lot of people feel sick when they try it. Do you want to?

I want the English News!!!!!!!!!!!!
